

INTEGRITY GEL CLEANSER

- PLEASANT FRAGRANCE
- CONTAINS A MOISTURIZING PEACH OIL
- ALCOHOL BASED

THIS PRODUCT: Integrity Gel Cleanser comes in a convenient spray pump application. It was formulated with moisturizing oils to protect the cuticles and skin from becoming dry due to the alcohol content that are in most gel cleansers.

HOW TO USE: After you have cured your gel nail you will spray it with the gel cleanser and use a lint free wipe to remove the tacky layer. The gel cleanser will not dull the high shine of the gel. It is not to be used to cleanse the nail plate as it has oils in it and will cause lifting. You can use it to clean your tabletops, lights, and your brush.

INTEGRITY GEL CLEANSER is available in

2oz convenient pump spray bottle

8oz refill bottle

INTEGRITY CLEAR FORMS

- **INNOVATIVE HEART SHAPED DESIGN**
- **HIGH QUALITY ADHESIVE**
- **CLEAR MYLAR**
- **PREFORATED BACK**
- **DISPOSABLE**

THIS PRODUCT: Integrity's innovative heart shaped design ensures maximum stability while the high quality adhesive keeps the form exactly where you place it. The transparency of the Mylar guarantees perfect curing of even the strongest pigmented gels. Designed with guide lines to customize the desired length and shape of the nail enhancement.

HOW TO USE: Integrity Forms are disposable for convenience and sanitation. Use any time you are sculpting a gel or acrylic enhancement.

- **FAST 90 SECOND FINAL CURE**
- **ODORLESS**
- **STRONG AND FLEXIBLE**
- **MAXIMUM ADHESION**
- **HIGH GLOSS SHINE**

CLEAR GEL

Clear gel is a multi-purpose one-step gel. It is thinner than a builder gel and thicker than a base gel. It is self leveling with the perfect viscosity.

Clear gel is used to base the nail by using a thin polish like application. It is also used as a builder gel by simply picking up a larger application. It will not run into the cuticles. Lastly it can be used as a top gel with a very brilliant shine. You can also use this gel over your acrylic enhancements. For maximum adhesion use clear gel as a base for all applications

PINK GEL

Pink gel is a multi-purpose one step-gel. It is a clear base with colored added. It can be used as a base or a builder. Use the clear based pink tinted sculpting gel for aesthetic purposes, if the client wants a pinker or needs a more uniform nail bed color. For maximum adhesion it should be used over a thin layer of clear. Pink Gel has a brilliant high shine.

CLEAR AND PINK GEL available in .68oz jars and 4oz refill

WHITE GEL

White gel is a self leveling sculpting gel that has enough stability to hold a crisp, sharp smile line. It has a medium viscosity, giving you the time and control you need to perfect your skill. This unique formula allows you to sculpt the perfect French nail.

THICK WHITE GEL

Thick white gel has a thick viscosity with a light textured feel. The thick viscosity is perfect for sculpting. This gel does not self level, it will hold its shape while you sculpt all your nails. Thick white gel is considered a European style gel. Create crisp smile lines

WHITE GEL AND THICK WHITE GEL available in

.68oz jars

FRENCH WHITE PAINT

French white paint is a medium weight product designed to be used for aesthetic purposes, you can not sculpt with it. It is a bright white that should be applied between the layers of clear gel for a French manicure look. Perfect for pedicures. You use this product by applying it like a polish, lay a base of clear gel and cure, apply clear gel on top. Dries without a tacky layer. Can be used with acrylic.

CLEAR GLAZE

Clear Glaze is a light weight product designed to give all your enhancements a brilliant high gloss shine. It eliminates buffing and will save you time on all your services. You use this product by first filing your nail enhancement with a 150 grit file, omit the buffing. Remove all the dust from the nails and polish on Clear Glaze. Clear Glaze will make any filing marks disappear. Saves time, gives you a permanent high gloss shine, and can be charged as an add on service. Must be filed off to remove.

FRENCH WHITE PAINT AND CLEAR GLAZE available in

1/2oz bottles

INTEGRITY NAIL FILE

THE RIGHT TOOL FOR THE RIGHT JOB

- **DURABLE**
- **WASHABLE**
- **VERSATILE**
- **LONG LASTING**
- **SHAPED FOR MAXIMUM EFFICIENCY “TORPEDO SHAPE”**

50 pack

INTEGRITY UV GEL LAMP

FEATURES

- Single-handed compact design that fits onto any manicuring table
- A reflector that completely surrounds the inside of the lamp. Evenly distributes the UV light resulting in more efficient curing.
- Uses 4pcs 9watt UV bulbs= 36 watt
- Built in timer 90sec, 120 sec, and stay on option timer
- Removable top, making it easy to change the bulbs

GEL TERMINOLOGY

Tips- a method of extending the free edge of the nail by gluing an acetate or nylon extension to the natural nail.

Forms- a method of extending the free edge of the nail by providing a base to create an extension in gel and then removing the form.

Overlay- application of product over a natural nail or tip.

Sculptured- a method of creating a nail enhancement over a form.

Threading method- also referring to a string, ribbon, or tail method. A method of filling in low areas of the nail enhancement.

Floating method- a method of moving product with the belly of the gel brush using a side to side motion, utilizing the surface tension created between the brush and the gel.

Pulling method- moving the product by stroking the brush down the length of the nail from cuticle to free edge.

Freeze cure- also referred to as flash curing. A short period of partial curing which, prevents the gel from moving from where it's placed.

Heat transfer- a heating sensation that can occur during the process of curing gel nails.

Dispersion Layer - The sticky surface remaining on the gel after it is cured.

INTEGRITY GEL POLISH

CELEBRATE IN COLOR

INM PRESENTS AN UPLIFTING NEW COLLECTION OF GEL POLISH IN 10 HEAVENLY HUES

- Use Integrity Gel Polish instead of nail polish.

THIS PRODUCT: Integrity Gel Polish has a clear base with colored pigments added. The pigments in the colored gels are heavier than the actual gel and will tend to settle to the bottom of the jar; so they need to be stirred prior to use.

HOW TO USE: Finish the nail to the desired length and shape. Using a gel brush, apply a thin layer of the desired color to the surface of the nail from cuticle to tip. Cure for 120 seconds. Repeat until desired color is achieved. Be sure that you apply either over a tacky surface or that you have filed the prior to the gel polish application by using a 150 grit file (no buffing). Lastly apply either a coat of clear gel or clear glaze over the top.
