

PREP STEP

- **Cleanser and dehydrator-** Prep Step is a dehydrator and a cleanser for the nail plate.
- **No dyes** – There are no dyes or fragrances, which tend to leave a residue on the nail.

THIS PRODUCT: Prep Step is a pH-balancing agent and a dehydrator for the nail plate. Prep Step should be used prior to primer, resins, or polish. Prep Step does not penetrate the nail plate.

HOW TO USE: Prep Step is used on the natural nail prior to artificial nail applications. Gently remove the dust from the nail plate and apply two coats of Prep Step before priming the nail or polishing the nail. Prep step should also be applied prior to resin when doing fiberglass.

BENEFITS: Gives the nail a clean start to ensure the best adhesion possible when applying all artificial enhancements.

Prep Step is available in

- 1/2 oz. bottle
