

WRAPPED IN GLASS

WRAPS THAT PROVIDE BEAUTY & STRENGTH

FIBERGLASS/SILK

- **FINEST WOVEN SILK**
- **FINEST WOVEN FIBERGLASS**

THIS PRODUCT: Added strength is provided by these self -adhesive strips. Fiberglass/Silk is used for traditional wrap procedures to increase the strength and create a beautiful durable nail.

HOW TO USE: Apply one coat of W.I.G brush-on resin to the nail, allow to dry. Pre-cut your fiberglass /silk and apply to the nail. Saturate the material with the W.I.G. brush on resin or you can use the W.I.G resin with the nozzle. Apply a second coat.

W.I.G FIBERGLASS/SILK comes in:

2pk 1x36

WRAPPED IN GLASS

W.I.G BRUSH-ON RESIN

- GREAT CONTROL
- NO BUBBLES

THIS PRODUCT: W.I.G. brush on resin is a medium viscosity resin that is designed to work with either fiberglass or silk applications. The brush-on applicator gives you total control of the resin during the application. This resin has excellent clarity and strength.

HOW TO USE: W.I.G brush on resin is used as a base prior to the silk/fiberglass application, this will give you the most control. For best results allow to air dry(the first coat), if not you can spray it with the spray activator. Next use it to saturate the fiberglass/silk material.

Available in: 0.5oz

WRAPPED IN GLASS

W.I.G. RESIN

- THIN VISCOSITY
- NOZZLE APPLICATION

THIS PRODUCT: Is a thin viscosity resin allowing for a faster drying time. Can be used to apply tips. Gives excellent clarity and strength.

HOW TO USE: Apply using the nozzle, squeeze the resin to the tip of the nozzle and spread onto the nail. To dry apply spray activator. Next apply the fiberglass/silk. Repeat the steps of the resin application.

Available in: W.I.G. resin- .5 and 1oz

WRAPPED IN GLASS

W.I.G ACTIVATOR

- **ACTIVATES ANY CYANOACRYLATES IMMEDIATELY**
- **DRIES ON CONTACT**

THIS PRODUCT: This spray activator is designed to accelerate the drying time of resins on contact. It will not cause burning on the nail plate.

HOW TO USE: Hold W.I.G. Activator 8-10 inches away from the nail and lightly spray. This can be used with both the W.I.G. brush on resin or the W.I.G. resin.

AVAILABLE IN:

2oz activator with pump

8oz activator refill

WRAPPED IN GLASS

W.I.G. BUILDING RESIN

- **THICK VISCOSITY**
- **GOOD FOR NAIL REPAIRS**

THIS PRODUCT: W.I.G. building resin is a thick viscosity resin that is designed to build thickness in desired areas and reinforce the strength of your wraps.

HOW TO USE: Apply a small bead to the nail and use the W.I.G. Brush on activator to smooth the resin over the surface of the nail. Use one to three coats depending on the desired effect.

W.I.G. BUILDING RESIN is available in:

1oz building resin

WRAPPED IN GLASS

W.I.G. BRUSH ON ACTIVATOR

- **ACCELERATES DRYING**

THIS PRODUCT: W.I.G. Brush on Activator will allow you to accelerate the drying process of the resin while maintaining a smooth consistent application.

HOW TO USE: After applying a small bead of building resin to the nail, take brush on activator and smooth the resin over the entire nail surface. The brush stroke should be similar to polishing a nail. Do not wipe excess off on a towel as it will harden the brush. Place it back in the bottle when finished.

W.I.G. BRUSH ON ACTIVATOR is available in:

1/2oz bottle
